COLD PROTECTION

Protection against cold is expressed by a series of three performance levels. All gloves must achieve at least performance level 1 for abrasion and tear.

CONVECTIVE COLD (X - 4)

CONTACT COLD (X - 4)

WATER PERMEABILITY (0 or 1)

EN511

Resistance to **convective cold**
(performance level 0 to 4)
based on the thermal insulation
properties of the glove which
are obtained by measuring
the transfer of cold
via convection

A

Resistance to **contact cold**
(performance level 0 to 4)
based on the thermal resistance
of the glove material when
exposed to contact with
a cold object

B

Penetration by water (0 or 1)
0 = water penetration
1 = no water penetration
